

DELTA SPRAY

Graphite assembly compound

Description

Preventive treatment against fretting corrosion. Compound with a high concentration of molybdenum disulphide (MoS2). High resistance to pressure and adhesion. Black colour.

Applications

Compound for lubrication (pivots, slides, gears, etc.) and assembly (assemblies, cottering, threading, etc.) of all mechanical parts subject to very high loads and vibrations.

Technical data

Operating temperature range: -35°C to +420°C
